

Repentinamente la inteligencia artificial se volvió cosa pública, caída del cielo, generando una conmoción que aún no sabemos qué forma tomará, posiblemente la de una nueva naturalización, la de un nuevo estado de cosas rápidamente absorbido. A la vez accesible y siniestra, minuciosa y genérica, trivial y todopoderosa, personalizada y despersonalizada, transparente y opaca, agradable y repugnante, fascinante y aterradora, se volvió tema y métier de todos por igual. Mi madre la usa, mi padre habla de ella, los niños juegan con ella. Verborragia que hace sistema con el nada nuevo, es capaz de producir todo y a la vez nada significativo, máquina prolífica de proliferación del sinsentido. Su eficacia productiva y su capacidad de llenar el mundo de imágenes conducen al vacío absoluto, pero sobresaltarse es de gallinas, porque no hay salida, menos aún es inteligente aferrarse a sistemas de valores perecederos, ahora además irremediabilmente débiles. Nunca lo ha sido. Cualquier forma de resistencia u omisión solo consigue tomar la forma de la hipocresía moralista y la ceguera.

2023

“Yo no busco, yo encuentro. Buscar es partir de hechos conocidos, y querer encontrar algo conocido en lo nuevo. Encontrar, eso es lo totalmente nuevo, también en el movimiento. Todos los caminos están abiertos, y lo que se encuentra es algo desconocido. Es un riesgo, una sagrada aventura. La incertidumbre de tales riesgos solo la pueden asumir quienes se sienten protegidos en la desprotección, quienes en la incertidumbre o en la desorientación se sienten guiados. Quienes en la oscuridad se abandonan a una estrella invisible y se dejan atraer por su destino, en lugar de fijarlo a partir de sus limitaciones humanas. Esta apertura hacia todo nuevo conocimiento, hacia toda nueva vivencia interior y exterior, esa es la esencia del ser humano moderno, quien, pese al miedo de ser arrastrado, experimenta, sin embargo, la gracia de sentirse amparado en la manifestación de nuevas posibilidades.”
Pablo Picasso

Repentinamente la inteligencia artificial se volvió cosa pública, caída del cielo, generando una conmoción que aún no sabemos qué forma tomará, posiblemente la de una nueva naturalización, la de un nuevo estado de cosas rápidamente absorbido. A la vez accesible y siniestra, minuciosa y genérica, trivial y todopoderosa, personalizada y despersonalizada, transparente y opaca, agradable y repugnante, fascinante y aterradora, se volvió tema y métier de

todos por igual. Mi madre la usa, mi padre habla de ella, los niños juegan con ella. Verborragia que hace sistema con el nada nuevo, es capaz de producir todo y a la vez nada significativo, máquina prolífica de proliferación del sinsentido. Su eficacia productiva y su capacidad de llenar el mundo de imágenes conducen al vacío absoluto, pero sobresaltarse es de gallinas, porque no hay salida, menos aún es inteligente aferrarse a sistemas de valores perecederos, ahora además irremediamente débiles. Nunca lo ha sido. Cualquier forma de resistencia u omisión solo consigue tomar la forma de la hipocresía moralista y la ceguera. Lo mismo sucedió con cada desarrollo técnico a lo largo de la historia de la modernidad, amenazas irremediables y cada vez igualmente espeluznantes de la experticia, la tradición, la disciplina, la autoría, y los valores establecidos, y simultáneamente los medios más fluidos y rejuvenecidamente enriquecedores para su redefinición radical. Cada muerte del arte o de la arquitectura se ha vuelto históricamente la precondition integral de una nueva forma de vitalidad, más vigorosa, más fértil, más diestra, incluso más intrínseca a su propia definición. Abordar crítica pero hábilmente el nuevo espectro de sentido que la inteligencia artificial supone para la arquitectura es el doble desafío de este campo menor. A este efecto, investigaremos las capacidades de Mid Journey para producir cultura arquitectónica instantánea mediante su consumo voraz y su proliferación desmedida. Utilizando como plataforma común una base de datos restringida a la producción de las 50 arquitecturas más manifiestamente canónicas de los últimos cinco siglos (de Leon Battista Alberti a Rem Koolhaas), navegaremos atemporalmente por el mar histórico de la arquitectura, pensando su devenir de manera atenta pero abierta, sin rendir pleitesía a su ortodoxia, jugando seriamente mediante significados, sentidos, e implicaciones. Las clases serán talleres cortos de pensamiento intuitivo (la intuición como método de construir cultura), aprendiendo a mirar atentamente la arquitectura, identificando ingenios, desplegando intuiciones, formulando ideas, construyendo nuevas formas de sentido que den alegría en el sentido vital y profundo de la palabra. En la versión AI, el procedimiento arquitectónico aprenderá por diversión, por desvío, por sensibilidad visual,

por afinidad, rizomáticamente, sin sentido a priori, con intuiciones precisas, construyendo ideas generales desde afuera hacia adentro, worlds of their own a la inversa, nomadismo in situ. Cada trabajo producirá una miríada (un mosaico) de proyectos cándidos y elementales a partir de un material que progresivamente se mezclará con otros, se destilará y se nutrirá de conceptos, enfocando fundamentalmente en la generación de ideas y de formas nuevas de arquitectura mediante (pero no retenidas en) la estilización pueril de recursos y clichés. Trabajaremos (principalmente en clase) con elevaciones, considerando que el plano mental de la arquitectura (el plan, la organización, el orden, la abstracción, la estrategia) hoy parece haberse vuelto vertical (la imagen, la apariencia, la persuasión, la seducción, la visualidad), sin por ello perder la capacidad de abstracción y la voluntad de pensamiento del proyecto transformador. Será, en este contexto, condición primordial (y soberanamente jovial) del trabajo generar ideas ingeniosas, inteligentes, cultas, duraderas, mediando la proliferación con el tamiz del pensamiento. Finalmente, el mundo se ha vuelto cuadrado, y toda imagen arquitectura.

2023

Repentinamente la inteligencia artificial se volvió cosa pública, caída del cielo, generando una conmoción que aún no sabemos qué forma tomará, posiblemente la de una nueva naturalización, la de un nuevo estado de cosas rápidamente absorbido. A la vez accesible y siniestra, minuciosa y genérica, trivial y todopoderosa, personalizada y despersonalizada, transparente y opaca, agradable y repugnante, fascinante y aterradora, se volvió tema y métier de todos por igual. Mi madre la usa, mi padre habla de ella, los niños juegan con ella. Verborragia que hace sistema con el nada nuevo, es capaz de producir todo y a la vez nada significativo, máquina prolífica de proliferación del sinsentido. Su eficacia productiva y su capacidad de llenar el mundo de imágenes conducen al vacío absoluto, pero sobresaltarse es de gallinas, porque no hay salida, menos aún es inteligente aferrarse a sistemas de valores perecederos, ahora además irremediabilmente débiles. Nunca lo ha sido. Cualquier forma de resistencia u omisión solo consigue tomar la forma de la hipocresía moralista y la ceguera.
